

Designed to provide a sophisticated laboratory whilst not compromising on space.

MOBILE LABORATORIES

With the ever increasing need to conduct onsite processing, GLSI have designed a new mobile laboratory which does not compromise on space. Deciding to embark on a mobile solution often sacrifices the room you have to work in. We were presented with the problem of how can we create a mobile laboratory but increase the operational space so to not affect the working environment. As a solutions specialist we took on this challenge and created a mobile laboratory with an expanding side increasing the work area by almost double.

The GLSI mobile laboratory provides a full turn key solution for a range of operational functions. We offer a variety of solutions tailored to each project requirement and offer full project management support.

With our in-house expertise we are able to support a wide variety of markets which have a requirement for mobile capability. Our team of dedicated staff have the experience to design, build and deliver to anywhere in the world within a short timeframe.

BFL Biological Field Laboratory

- Design:** 40ft mobile unit with expanding side pod
- Capability:** Field Analytical Sampling Laboratory
- Mobility:** Heavy Goods Vehicle (tow)
- Key Equipment:** PCR / ELISA / Lab Equipment / Sample Preparation / Communication Equipment

MIRU Major Incident Response Unit

- Design:** 20 or 40ft Converted Container with expanding side pod
- Capability:** Responding to major and critical incident/emergencies including CBRN, DVI and major crime scenes
- Mobility:** Heavy Goods Vehicle (tow) / Helicopter / Aircraft
- Key Equipment:** CBRN PPE / ELISA / Communication Equipment / Sample Preparation

MOBILE RESPONSE

CSIK Crime Scene Investigation Kit

Design: Compact Trailer with full CSI RAPID Kit

Capability: Rapid Response to a major criminal investigation

Mobility: Helicopter / Cargo Aircraft / Vehicle (Tow)

Key Equipment: Scene Management / Evidence Recovery / Latent Print Processing

CSIU Crime Scene Investigation Unit

Design: Off-Road Unit

Capability: Off-Road Crime Scene Investigation Unit / Command Centre

Mobility: Vehicle (Tow) / Extreme Terrain

Key Equipment: Chemical Processing / Evidence Recovery / DNA Processing

MHC Medical Health Centre

Design: Trailer unit

Capability: Medical Health Centre / Screening / Walk in Clinic

Mobility: Vehicle (Tow)

Key Equipment: Medical Suite / Administration / Drug Storage / Medical Equipment

DVIU Disaster Victim Identification Unit

Design: Container with options for expanding side pod

Capability: DVI Rapid Response

Mobility: / Helicopter Drop / Aircraft

Key Equipment: Drone / Communication Equipment / First Aid / Victim Care

DNAFL DNA Forensic Laboratory

Design: Trailer with options for expanding side pod

Capability: Onsite DNA Analytical Services

Mobility: Heavy Goods Vehicle (Tow)

Key Equipment: Real-time PCR / Gel Electrophoresis / Lab Equipment & Consumables
